NOMAD[®] PRO

Rectangular Collimator Adapter

ALARA Made Possible!

ALARA (as low as reasonably achievable) means that radiation exposure dose is reduced to the lowest level possible.

The NOMAD Pro **Rectangular Collimator Adapter** easily snaps on the front of the NOMAD Pro cone and **reduces the 6 cm patient dose area by 58%**.

Talk to your dental equipment specialist today about the amazing NOMAD Pro and how it can save you money and time while reducing exposure for both the operator and patient.
